

IT'S EARTH DAY!

On April 22nd, we celebrate Earth Day. Our planet is a fantastic place and we share it with animals and plants. Our planet is very rich and hospitable. Unfortunately, we don't take care of our mother earth.

Earth Day is a day to remember to take care of our planet. We can keep Earth clean by following the rule of "reduce, reuse, recycle".

Reduce means use less. We can reduce our use of resources like water or plastic.

Reuse means use waste materials again rather than throwing them away. We can reuse many things such as jars, bottles, plastic bags.

Recycle means to make something new from something old. We can keep Earth clean by recycling materials such as aluminum, glass, paper, and plastic.

We must do these things every day, not just on Earth Day. We must all do our part, and we can make a difference. If we take care of the planet, we take care of ourselves.

1. When is the Earth Day celebrated?

2. How can we keep our planet clean?

3. What does it mean "TO REDUCE"?

4. What does it mean "TO REUSE"?

5. What does it mean "TO RECYCLE"?
