

Groundhog Day

Groundhog Day is on February 2nd every year.

It's a part of popular culture among Americans in the United States and it centers on the idea of the groundhog coming out of its home to "predict" the weather.

If the groundhog doesn't see his shadow, spring will come early.

If the groundhog sees his shadow, there will be six more weeks of winter. The largest Groundhog Day celebration is in Pennsylvania.

Groundhog is an animal like a squirrel. It lives in forest in North America.

It eats grass and nuts and it sleeps in winter.

MY SHADOW IS HERE, SIX MORE WEEKS OF WINTER

SHADOW

MY SHADOW ISN'T HERE, SPRING IS NEAR

Answer:

1) When is Groundhog Day?

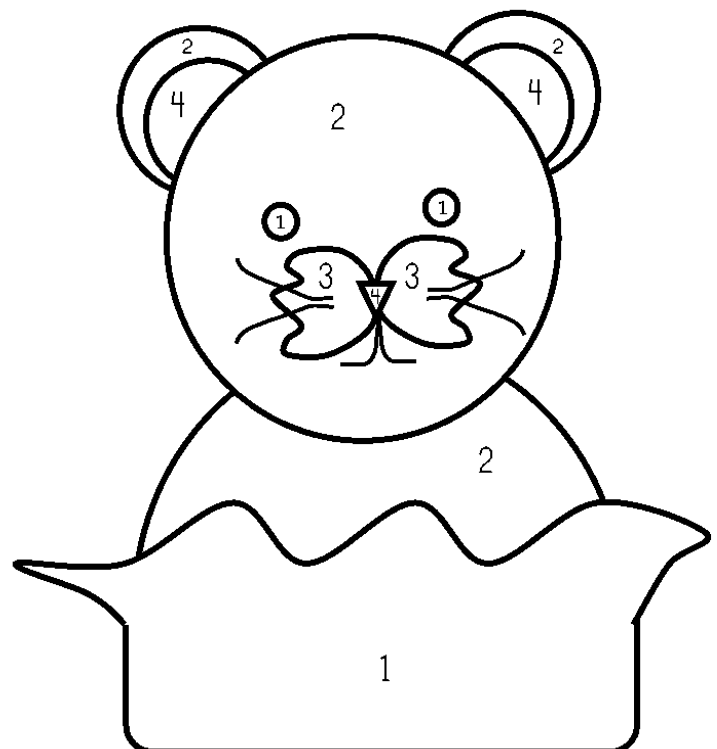

2) What is a groundhog?

3) Where does it live?
