

RECYCLING

THE 3 R's: **REDUCE** - **REUSE** - **RECYCLE**

REDUCE →

It means to reduce the amount of things you use.

Example: you can use a reusable shopping bag instead of many plastic bags

REUSE →

It means to use the material over again for same purpose or something else.

Example: you can use your shopping bag to put in your lunch to go to school

RECYCLE →

It means to use the material over again to make a new product

Example: old newspaper can be recycled into new paper products
