

The first Thanksgiving

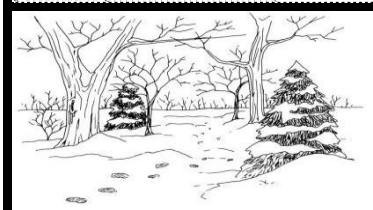

In 1629 the Pilgrims leave their home in England for religious problems.

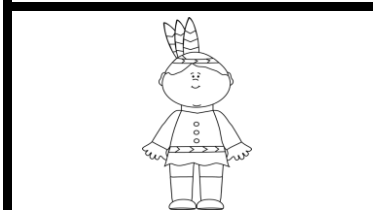

They sail on a ship called "The Mayflower".
The trip across the ocean takes 66 days.

They arrive to a new place and they call it Plymouth

It's winter and it's snowy and very cold.
Many Pilgrims die.

Spring comes and an Indian named Squanto, helps the Pilgrims how to survive in the new world.

To celebrate the harvest in autumn, the Pilgrims and the Indian have a feast with pumpkins, corn, cranberries and turkey

2 Answer:

1) When do the Pilgrims leave England?

2) What is the name of the ship?

3) What season is it in the new world?

4) What do they eat the first Thanksgiving?
