

Make a clock

How to make the clock

1. Cut out clock face, hour & minute hands.
2. Cut holes out in the grey circles and attach the hands to the face using a paper fastener (pin style with two flaps at the back that you open out to secure, usually bronze colour)
3. Put a bit of tape at the back to hold in place.
4. As the teacher calls out the time students set their clocks to the correct answer
